02. Background and main content of the event

EXHIBITION INTRODUCTION:The "Huaju Chuangli (Wuhu) International Foundry Exhibition" collaborates with major intelligent manufacturing brands to jointly build a high-level, global influential Huaju Chuangli international exhibition platform for related fields such as intelligent machinery and new energy, aviation, electronics, pharmaceuticals, and chemicals. It will have a positive promoting effect on the development of related industries and make positive contributions to the green and sustainable development of regional economy. This expo has 5 exhibition areas: high-end machine tools and forging machinery exhibition area, welding cutting and industrial automation exhibition area, robot and intelligent manufacturing equipment exhibition area, quantity cutting tool exhibition area, and mold manufacturing exhibition area. Related supporting and service products in the fields of intelligent equipment for new energy vehicles, intelligent manufacturing, new intelligence, automated mechanical equipment, laser industry, and aviation industry development. In recent years, China's industrialization has rapidly developed towards intelligence, green and low-carbon direction, and there is also huge growth space. The manufacturing industry should seize the historical opportunity at the beginning of 2026, take advantage of the situation, and embark on a new journey!

This exhibition is expected to bring together 500 casting and related enterprises, with an exhibition area of 20000 square meters, attracting over 15000 professional visitors. With the requirements of "internationalization, specialization, and high level", the exhibition will invite casting manufacturers from all over the country and the world to showcase their latest products, technologies, and equipment. This not only helps industry executives comprehensively understand the latest trends in the global foundry industry chain, but also creates a one-stop procurement platform for products, materials, and equipment for the audience.

- ◆ Comprehensive three-dimensional advertising promotion, Invite professional high-quality buyers through multiple channels, Ensure the vested interests of exhibitors;
- ◆ Assist the manufacturing industry in accelerating its implementation The 'dual carbon' goal
- ◆ It is an industry event with a certain scale,
- ◆ Exhibiting alongside industry giants, comprehensively enhancing Enhance your brand value;
- ◆ The exhibition will have over 500 distributors

Exhibitors 500+

The venue covers an area of 20000 m²

1. Various types of castings: cast steel, cast iron, stainless steel castings, non-ferrous castings (aluminum, zinc, copper, magnesium), ductile iron castings, heat-resistant and wear-resistant castings, etc., covering precision casting, sand casting, investment casting, lost foam casting, centrifugal casting, gravity casting, casting, high/low pressure casting, special casting and other processes. At the same time, various types of component castings such as automobiles, motorcycles, pumps and valves, motors, pipe fittings, bearings, machine tools, ships, wind power generation, internal combustion engines, diesel engines, engineering machinery, rail transit, heavy machinery, mining machinery, textile machinery, printing machinery, medical machinery, general machinery, power transmission and transformation, electronic communication, petrochemicals, building hardware, instruments and meters, municipal engineering, etc.

2. Casting equipment: various melting furnaces, automatic pouring machines, molding lines, core making centers, sand mixers, sand processing equipment, sand regeneration equipment, shot blasting cleaning equipment, die-casting machines, low-pressure casting machines, precision casting equipment, solid casting equipment, rapid prototyping equipment, cleaning and environmental protection equipment, dust removal and purification systems, industrial cleaning technology equipment, aging treatment equipment, heat treatment equipment, casting die-casting molds, casting defect repair equipment, casting/casting/die-casting robots (robotic arms), automated casting finishing and polishing equipment, etc.

3. Casting post-processing equipment: CNC lathes, machining centers, milling machines, grinders, drilling machines, shot blasting machines, polishing machines, sandblasting machines and other equipment

4. Casting materials: ferroalloys, non-ferrous metals, casting coke, refining agents, inoculants, spheroidizing agents, creep agents, slag removers, quartz sand, coated sand, chromite sand, bead sand, bentonite, coal powder, carbonization agents, casting resins, curing agents, coatings, refractory materials for casting, silica sol, wax materials, insulation risers, filters, metal abrasives, steel shot, repair paste, etc.

03. Exhibition Highlights

The Wuhu International Foundry Exhibition will undoubtedly be a grand event in the foundry industry, providing an excellent opportunity for industry professionals to exchange and cooperate, expand their business, and understand industry trends. Here, you will experience the cutting-edge casting technology and products, and feel the thriving development of the casting industry.

04. Meeting arrangement

Exhibition rendering

Special exhibition renderings

NAME	SPECIFICATIONS	FACILITIES	PRICE
International standard booth	3*3m	1 fascia board, 1 negotiation table, 2 chairs, 2 spotlights	5800/Extension
Overseas exhibition booths	3*3m	1 fascia board, 1 negotiation table, 2 chairs, 2 spotlights	8800/Extension
Luxury booths for domestic enterprises	3*6m	Luxury booth with 50cm lintel and light box	12800/Extension
Luxury booths for foreign companies	3*6m	Luxury booth with 50cm lintel and light box	20800/Extension
Guojian's internal exhibiting companies Guangdi	6*6m	Without any facilities, can be installed by oneself	680Yuan/m ²
Foreign exhibiting companies in Guangdi	6*6m	Without any facilities, can be installed by oneself	1080Yuan/m ²
